MEPS Publications

We produce a family of monthly, quarterly and annual reports focusing on all the important issues in the international steel scene.

Monthly Reviews

- European Steel Review
- Supplement To European Steel Review
- International Steel Review
- Stainless Steel Review
- Developing Markets' Steel Review
- Ferrous Scrap Review
- Semi-Finished Steel Review

These are in the form of newsletters for easy presentation. Each issue is prepared from “in depth” research into market conditions and price trends in the relevant region. We undertake extensive discussions with end-users, service centres and steel traders actively operating in the market for each product category. The data collected is analysed and evaluated for presentation in a coherent format useful to our clients. We pride ourselves on being the world leader in the provision of accurate steel price information.

Tables are published showing high and low prices for the most popular product categories and grades. These values are acknowledged as the benchmark for pricing in each country. They are used by steel consumers in a wide range of manufacturing and construction sectors to obtain an accurate but independent viewpoint of both local and foreign markets. In addition, these reports are utilised by industry analysts, bankers and government departments to keep abreast of current trends within the sector.

Each monthly review incorporates narrative, highlighting the important tendencies on supply, demand and price. These comments are an extremely useful adjunct to the main price tables which enable our clients to understand the likely market trends. Finally, these regular reports are often used as the reference for price agreements between customers and mills.

Annual Report

MEPS Steel Price Forecasts To 2020 - A Five Year Steel Price Forecast

The predictions in this family of reports have been prepared using the key factors which MEPS have found to be statistically significant in affecting steel prices. They have been extensively researched and developed through rigorous formal analysis of the global market.

Available for the following regions:
European Union, North America and Asia

Free samples of MEPS Publications are available at our website

Section 5

Definitions

Definitions

Hot Rolled Coil:

Hot rolled wide and narrow strip/sheet, for sale by the producers, destined for direct use or secondary processing outside the factory of origin. Also includes plate from coil produced on a strip mill.

Hot Rolled Plate:

Products of thickness >10mm, and width >600mm in cut lengths, produced on a reversing mill.

Cold Rolled Coil: (Excluding Electrical Sheet)

Cold rolled products of thickness <3mm, in cut lengths or coils, destined for direct use in original form (i.e. not for use as substrate for further coating inside the factory of origin).

Metal Coated Coil and Sheet:

Sheets in cut lengths or coils, having a hot or cold rolled substrate base with the application on one or both sides with a metal coating applied either electrolytically or hot dipped.

Electrical Sheet:

Silicon electrical grades, cold rolled as non oriented and grain oriented sheets.

Tin Mill Products:

Cold rolled sheet from a tin mill for subsequent coating with tin or chromium oxide.

Sections and Beams:

Medium and heavy structural sections and wide flanged beams >80mm wide and sheet piling. Also includes rails, except in the EU and Taiwan.

Wire Rod:

Hot rolled wire rod, wound in irregularly sized coils - including concrete reinforcing bars sold in coils.

Concrete Reinforcing Bars:

In sizes >5mm having a uniform surface, crenellated or ribbed and intended for reinforcement of concrete, including straightened wire rod. Reinforcing bars in coils are not included.

Merchant Bars:

Small structural sections <80mm and bars in all sizes.

Production:

EU, China, Japan, South Korea, Taiwan and Brazil statistics relate to all grades of steel. India relates to carbon grades. India bar and rod production is aggregated.

Shipments:

US statistics relate to all grades of steel. US electrical sheet shipments not available due to disclosure.

Trade:

Includes all trade with third countries.

MEPS Regional Average Prices:

Regional prices are derived from an average of country data collected in an area, sold ex-mill for forward delivery to their domestic/local markets.
